Brett/Janine

I need some urls from you guys for the IT Forum meeting tomorrow

Brett, i think you can provide the following: MS River Floods, Las Conchas Fire

Janine, please provide: Hurricane Irene and Silvertip

Thanks

The "ER Template Viewer" on Sidewinder is a compiled version of the flex viewer. In order to make changes to how the widgets work, the source code of the widgets must be edited which is not accessible after the source code is compiled. I didn't start this R6 EOC Flex app. using the ER Template Viewer compiled code, and I tried to make sure and match the .xml's with the source code versions of each widget, but when I matched the Splashwidget.xml a few weeks ago, it must have been an old version.

_____

i just downloaded the current template on sidewinder and verified that the mySplash widget is correct

```
<?xml version="1.0" ?>
<configuration>
    <!--
        Refer to the doc below for valid HTML tags that can be used for the content

http://help.adobe.com/en_US/FlashPlatform/reference/actionscript/3/flashx/textLayout/conversion/TextCon

    -->
    <width>475</width>
    <height>675</height>
    <contents>
    <content tabname="Main">
        <![CDATA[<p align='center'>
            <img src='assets/images/ER_logo_collarless.png' width='200' height='200' />
        </p>
        <p align='center'>
            <font size="16"><b>For Official Use Only</b></font>
        </p>
        </p>
        <p align='center'>
            <font size="16"><b><u>Emergency Response Operations</b><u/></font>
        </p>
        </p>
```

```
        <p align='center'>
<font size="16"><b>Response Name</b></font>
        </p>
        <p align='center'>To add data to the map, use the window in the
 bottom left corner.  </p>
```

It appears we were using a previous template version.

Subject: Re: Secure Region 6 Facility Services/Flex Update to be served on orator Update F1v1

I am testing this on staging while I'm an logged in via my AAA token and the R6 Facilities layer
failed to load. I'm also concerned that we may be using the wrong template because the splash
screen contains a typo that Janine identified prior to releasing the final template. If you
launch the viewer you will see that the splash screen reads "Emergence Response Operations"
Please change that to "R6 PDO Tool".

Thanks

────────────────────────────────

Hi, we have posted an update to the R6 EOC Flex App. onto Sidewinder. This package contains all
new data/mxd/msd and all new FlexCode.

The .zip is located on Sidewinder here: /R6/R6EOCFlex1/R6EOC_Flex_F1v1.zip

I included a RTP_Deployment_Notes.txt in there to define the Service Names/descriptions and other
relevant info for the deployment to hopefully make it smooth.

Let me know if there are any questions or if something doesn't work correctly.

Thanks RTP.

Brett:

We have downloaded the "R6EOCFlex1_ViewerCode_v2.zip" package from the sidewinder server and
installed it on the NCC Orator staging server per your request.

You can check the apps update at:
http://orator-s.epa.gov/R6EOCFlex1/

Let us know if you need anything else.

────────────────────────────

Hello,

After review of the Orator-Staging version with Eric, a revised version of the Flex Viewer Code
has been uploaded to Sidewinder at:
"/R6/R6EOCFlex1/R6EOCFlex1_ViewerCode_v2.zip"
Previous version moved to Archive folder.

No changes affected any REST service URLs, so the same exact places will need replacement as the
previous version, and the .txt for RTP deployment is still the same.
Currently, there are no changes to the data/mxd/msd, only the Flex code.

Thanks RTP.

────────────────────────────

Brett:

The requested new ArcGIS service has been set up on the Orator staging server in the NCC:
Http://orator-s.epa.gov/ArcGIS/rest/r6eocflex1/

The new GIS apps with flex viewer has been installed on the Orator staging server in the NCC:
Http://orator-s.epa.gov/E6EOCFlex1/

You may notice two things with the new flex apps:
1. It seems to have problems to get NHD data from "nationalatlas.gov" that is outside the EPA.
2. The TOC Legend function seems to have problem. This seems to be the same problem that was
resolved by an updated congfig.xml yesterday.

I sent out this email yesterday evening but found out this morning the email did not get out.

Let us know if you need anything else.

Thank.

Subject: Re: Secure Region 6 Facility Services to be served on orator
=======================
 I uploaded two .zips to Sidewinder at "R6/R6EOCFlex1"
This includes the R6 EOC Flex Viewer v2.5 Code in one .zip and R6 Facility mxd/msd/data (all
facility data in one .gdb) in the other .zip.
I included a short .txt note for deploying from R6 to Orator(or -S) to try and keep it easy with
the service REST paths matching in the code under "R6EOCFlex1\RTP_Deployment_Notes.txt"

This flex viewer contains a few compiled widgets that are in the early development stages for Eric
and team to test out/find bugs and make suggestions.

Let me know if anything doesn't work during the Orator (or -S?) deployment, and I will get it
fixed as soon as possible.

Thanks for the help RTP.

Subject: Secure Region 6 Facility Services to be served on orator

Brett,

Please take the Region 6 Facilities layer on R6GIS1 you showed me yesterday and publish that MXD
into a MSD so Torrin/Qi can take and serve off the Orator servers. Once the MSD is created
Torrin/Qi can provide the REST service page for you to use on the R6 EOC viewer.

If any of you have any questions, please call me.
